Subject: RE: Prep for April 9 meeting re: baselines for approval

Hi All,

From your perspective, what is the minimum which is needed in order for you to recommend approval for each of the conditions, specifically:

For OSDS: if can't get the regulation change through the Oregon Legislature, what are other options?

For New Development: minimum of what needs to be included in document and for outreach

For Additional Forestry Measures: if can't complete the IR TMDLs, what is the minimum that needs to be included in a rule or if done through a guidance document, what kind of enforceability mechanisms would be acceptable? For the content, what is the minimum which would be required?

Jayne

I can take a stab at key messages but I think the minimum baselines are better left up to EPA as the lead technical experts for forestry, OSDS and new development. As a team approach, we should be able to pull things together for the meeting next Tues.

Hey Allison, I'm also out tomorrow, so we can touch base next week. I think it would be just compiling things and maybe giving it out to people on the 8th(?), so that people have looked at it and are ready to respond to what the key messages and baselines are rather than us spending time on the April 9th call developing key messages and figuring out baselines. At least, that's what I'm thinking would work well. Hope you had a good weekend - Jenny

Hi Jenny--

Heading out the door now and will be out tomorrow so won't be able to work on this until next week. When would they need it by? Hopefully not until the 9th? I've got some time next week to work on but also have some other stuff going on the first half of the week so may not be able to focus until Wed/Thurs. That doesn't give folks a lot of time to review ahead of time but perhaps that's ok for this initial meeting?

Hi Allison,

We just had an EPA check-in on CZARA, and one of the actions that came up was to pull together key messages for the Governor's meeting and the baseline for CNPCP approval from EPA and NOAA. I had offered to help out to take some work off folks who knew more what the key messages should be, but Dave Powers pointed out that you've usually pulled together first drafts and he's added to it, and that it's worked great.

I definitely don't want to add to your workload, but thought I'd check in with you if you preferred to be the point person on putting this together. I'm happy to take a first cut if you're busy or think it makes sense for EPA to coordinate this one.

Also, sorry again for the Governor's meeting being scheduled with the wrong people

from NOAA. That was obviously a big oversight, and you'd been very clear about the contacts and the travel constraints on time. Folks here were eager to schedule the meeting to get on everyone's calendar, but the coordination with staff didn't happen here before the invite happened. As Jayne pointed out, we at the staff level didn't even know the meeting had been set up. Anyway, we're coordinating better now that Jayne is back, so hopefully, this won't be an issue in the future.

Thanks and talk to you later - Jenny
